

## **greenValue GmbH (press release) – 22 years of pioneering sustainable projects**

### **A review of the development and achievements of greenValue GmbH**

Nuremberg, March 22th, 2024 – Since its foundation 22 years ago, greenValue GmbH has become firmly established as a successful service provider in renewable energies and environmental projects. With a recent focus on Mergers & Acquisitions (M&A), the company has achieved an astounding feat not only in performing due diligence, opportunities and risk management, and transaction control.

greenValue GmbH was committed to renewable energies and environmental projects from the beginning and has remarkably evolved in the last two decades. One focus is project management, project coordination, and M&A services for biogas and biomethane plants. The successful provision of those services has contributed to greenValue becoming a reliable partner for investors and companies interested in investing in renewable energies.

“We are proud of our 22 years of experience and expertise in renewable energies and environmental projects,” states Daniel Kellermann, founder, and Managing Director of greenValue GmbH. Our M&A services play a crucial role in supporting investors and companies in this sector. By implementing due diligence, risk evaluation, and transaction control, we help our customers make sound decisions and successfully conclude transactions.”

A view on greenValue timeline illustrates the company's manifold activities and achievements over the years. Since its founding in 2002, greenValue has continuously participated in more than 80 renewable energy projects, focusing on project development, management, and coordination over the last ten years. With a broad spectrum of services and a network of partners and customers, greenValue has developed into a significant player in the sector.

“Our long-term experience and our commitment to renewable energies and environmental technologies enabled us to create a solid foundation and establish ourselves as a reliable partner for investors and companies,” adds Daniel Kellermann. We are looking forward to further contributing to the promotion of a sustainable energy future and to supporting our customers in implementing their projects.

### **Quality and Transparency: greenValue relies on ISO 9001:2015 certification**

greenValue has adopted a quality management system to guarantee high-quality services according to DIN EN ISO 9001:2015. The monitoring audit takes place yearly, the last in September 2023. This contributes to a professional and transparent collaboration.

Looking towards the future, greenValue is planning to extend its range of services further and strengthen its position as a dynamic service provider in renewable energies and environmental projects. By delivering high-quality services and customized solutions, greenValue is perfectly prepared to be a reliable partner for investors and companies desiring to invest in a sustainable future.

### **Short profile:**

Since its founding in 2002, greenValue GmbH has been enthusiastically dedicated to renewable energies. As an information and consulting company with five dedicated employees, the company initiates and negotiates contracts, coordinates all processes in project implementation, and acts as a link between investors and project planners. With many years of expertise in the field of renewable energies, greenValue focuses on the segments: wind power, photovoltaics, biogas, biomethane, bio waste, green hydrogen, and bio-LNG.

In addition to mergers and acquisitions services, greenValue GmbH's range of services also includes project and asset management and the implementation of energy efficiency and energy generation systems. The combination of comprehensive specialist expertise and more than 20 years of experience forms the basis for the company's sustainable success.
